Office Action Summary	Application No. 10/791,614	Applicant(s) DEITZ, BURR V.	
	Examiner Mark J. Beauchaine	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The following is a quotation of 37 CFR 1.84(I) which forms the basis of the following drawing objection:

Every line, number, and letter must be durable, clean, black (except for color drawings), sufficiently dense and dark, and uniformly thick and well defined. The weight of all lines and letters must be heavy enough to permit adequate reproduction. This requirement applies to all lines however fine . . .

The drawings are objected to as failing to comply with 37 CFR 1.84(I) because line quality of the following figures are inadequate:

Figures 2A, 4, 5A and 5B; number and/or letters are not legible.

Correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 5, 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4 and 5 recite the terms "new" and "old", respectively. Said terms are ambiguous.

Claims 7 and 8 are redundant to claim 6. It appears that the Applicant intended for said claims to depend from a claim other than claim 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1- are rejected under 35 U.S.C. 103(a) as being unpatentable over Patent Number 4,874,348 by Lafreniere et al. The coin handling device of said '348 patent incorporates a tubular holder 10 that includes a scoop 15 that is used to assist in the collection of coins within said holder. Furthermore, the angled profile of said scoop creates a spade shape at the end of said holder. Although the coin handling device is not specifically a wrapper, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the angled scoop configuration of said coin holder into a flexible coin wrapper. Furthermore, such a scoop-type container end could incorporate a variety of profiles including both rounded and pointed edges.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Art Unit: 3653

Patent Number 5,595,338 by Abler because of its tube shaped wall 40,
Patent Number 4,091,599 by Lemieux because of its scoop 16,
Patent Number 3,851,755 by Hull et al because of its plastic wrapper material 79,
Patent Number 2,242,933 by Wagner because of its angled opening 13 and
Patent Number 208,902 by Fuller because of its scoop-shaped coin measure A.
